

sensaskin

pro-biotic skin care

The Sensaskin range of herbal-based personal care products was originally developed to help sufferers of inflamed, irritated and delicate skin. Herbalist Jane Christie, known and trusted especially by mothers of young children, formulated products in response to requests for non-invasive and natural - but still effective - soothing creams and washes. The results of using Jane's original solutions were so encouraging that Sensaskin as a business was born.

Jane didn't rest on her laurels, but continued to research and develop new and better, yet always gentle and natural, formulas. The latest exciting development is Sensaskin's Probiotic range.

Here is truly innovative skincare embodying a technically advanced culturing process that unlocks the goodness of its ingredients and creates a new generation of topical skin food.

Sensaskin Probiotics is simply – skin care suited to today's consumer demand for a more natural, life-enhancing product.

Sensaskin has redeveloped the wisdom of traditional cultures, formulating valuable herbal extracts to be more bio-available to the skin. The result is a step forward in skin care that nourishes the skin and avoids all harsh chemicals and preservatives.

Why is Probiotic better?

The Sensaskin Probiotic range facilitates a PH balance for healthy skin. The natural Alpha Hydroxy Acids (AHA's) are especially hydrating and soothing for sensitive skins. Probiotics help to inhibit the growth of bacteria, assist with the removal of dead skin cells and promote new cell growth. Sensaskin Probiotics assist in the rapid and effective absorption of biologically active ingredients into the skin. You can look forward to an improved appearance and feel of your skin.

Benefits of Sensaskin Probiotic Skincare:

Improved skin texture, due to:

- Superior hydration, the feeling of softness and smoothness.
- Gentle removal of dead skin cells and faster regeneration of new, healthy cells.

Greater skin nourishment from:

- Improved absorption of beneficial ingredients including carefully researched and selected herbal actives, thanks to our unique culturing process.
- Pure organic oils and butters.

Better skin conditioning because of:

- Use of pure, predominantly organic ingredients.
- Anti-bacterial properties of our traditional herbal extracts.
- Absence of harsh or toxic chemicals.

Shelf Life:

- Recommended unopened shelf life is 24 months from the manufacture date on the packaging.
- Recommended life after opening is 3 – 6 months.
- Best stored in a cool dry place out of direct sunlight.
